Video Broadcasting System

Infinity e-Campus TV

Infinity e-Campus TV is designed for school to utilize the existing digital school network so that all the classrooms, special rooms, library and assembly hall have high quality video from the source located at the studio room, headmaster room or any place within the campus.

Infinity e-Campus TV has a user-friendly interface, those non IT teacher or clerks at school can operate to start the broadcasting TV by pushing just a couple of buttons. Different video titles can be broadcasted to various classrooms at the same time.

- ✔ Low installation cost as hardware analogue cabling is not required.
- ✔ Small bandwidth is used up by multicast technology, the school network will not be affected.
- ✔ Real time broadcasting to the whole campus for event at hall or visitors at headmaster room.
- ✔ All students and guests at any location can participate by viewing the broadcasted video.
- ✔ The broadcasted video can be saved as a file which can be viewed later within campus or through Internet.
